IN SYNC WITH VICTORY

THE NEW FORIS FS2735 WITH CLOUD CONNECTIVITY

Our most advanced monitor for gaming and entertainment yet.

Enjoy smoothness and clarity when gaming, watching videos, or any other activity with this high-resolution (2560 x 1440) 27-inch monitor featuring an IPS panel and AMD FreeSync™ compatibility up to 144 Hz.

Unrivaled Visibility with Smart Insight Demolition

Smart Insight Demolition is our patented technology that vastly improves in-game visibility. It goes beyond the simple gamma curve adjustment that you get with conventional gaming monitors by analyzing each pixel individually and making areas that are too dark or too bright more visible.

Vastly improves visibility in dark areas

Vastly improves visibility in bright areas

G-Ignition Mobile – Use Your Smartphone Like a Remote Control

G-Ignition Mobile is a free app that lets you use your smartphone like a remote control to adjust the monitor's settings. In addition, this app accesses EIZO's free G-Ignition Drive cloud service for uploading and sharing your own monitor settings and downloading presets from other gamers.

The FORIS FS2735 is also compatible with the Windows software G-Ignition Ver. 3.0.

Never Miss a Call Again

Whenever you receive a call, e-mail, or other communication on your smartphone, G-Ignition Mobile will post a notification icon in the lower right corner of your screen. Now you can game with your headphones on without worrying if you can hear your smartphone's ringtone.

144 Hz Refresh Rate and AMD FreeSync™ Technology

Experience ultra-smooth game play free of motion blur and screen tearing with first-person shooter, racing, fighting, and other gaming genres. What's more, the FORIS FS2735 supports AMD FreeSync™ technology up to 144 Hz so you can enjoy seamless video display at the maximum refresh rate.

FreeSync default setting is 56 – 144 Hz. A setting of 35 – 90 Hz is also available.

Zero Delay Gaming with Extremely Low Input Lag

EIZO developed its own integrated circuit with virtually imperceptible input lag of less than 0.05 frames (0.35 ms)*.

** Measured at 144 Hz with blur reduction disabled.*

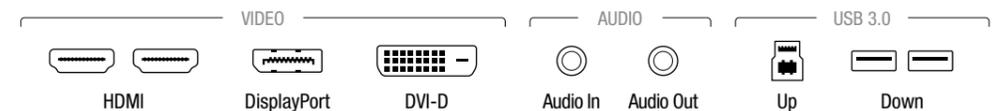

27-Inch WQHD High-Quality IPS Panel

The WQHD (2560 x 1440) screen has a high pixel density to render images in extreme detail. The IPS (in-plane switching) panel offers vivid colors and wide 178° viewing angles.
