Extreme performance under Extreme conditions

ACTIVE SENSING

Capture data with
strong sensing devices

ACTIVE ANALYTICS

Transform DATA
into INFORMATION

Public safety

Transportation

Logistics

Retail

Factory

Bank

EXTREME Visibility

Enables automatic capture of evidence at the highest quality under dynamic and challenging surveillance environments.

Intelligent Auto Mode (iA)

Advanced image stabilization is used to prevent capturing blurry images, and intelligent sensitivity automatically is used to adjust the camera's gain and shutter speed according to brightness levels and movement of the object.

Auto Scene Detection

Parameter Settings

Applications: City safety, traffic, transportation

	Conventional	iA Mode	
Velocity Detection			iA provides sharp images of moving vehicles with blur control
Day & Night Detection			Automatic reflection control provides more detail during difficult nighttime scenarios

Color Night Vision

Color Night Vision technology transforms a standard 1/3 inch sensor camera into an effective, low-light capable camera, enabling it to produce an extremely high-quality image even in the most challenging lighting conditions.

Applications: City safety, ports, perimeter security

Ordinary Camera 0.6 lx

Color Night Vision 0.6 lx

0 lux Pitch Dark Locations

Cameras with a IR LED can be used to monitor environments that are completely dark.

This enables areas without the level of illumination required to be monitored to prevent graffiti, illegal dumping, and property destruction.

IR LED can illuminate a wide area so that monitoring is not limited to a specific part of the image.

The built-in IR LED of the outdoor model can capture subjects up to 40 meters away.

Light levels are automatically adjusted for blown out highlights and screen whitening when the IR LED shines on a subject close-by, making the right areas highly visible.

The IR LED is covered to make it difficult to detect from the outside or to know which way the lens is pointing.

IR LED : OFF

IR LED : ON

EXTREME Visibility

144dB EXTREME Super Dynamic

Combined with the new 144dB enhanced SD capabilities, this high-performance face detection technology can clearly and automatically identify an individual's face.

It offers optimal facial recognition and can capture evidence even in dynamic scenes or heavily backlit conditions.

Super Dynamic : OFF

Super Dynamic : 144dB

Applications: Entrances of shopping malls and buildings

Intelligent Zoom Stabilization

High-power, 40x optical zoom lens allows for higher resolution images

of objects at a distance.

The advanced image stabilization function can stabilize high-power zoom images by absorbing vibrations.

Intelligent Zoom Stabilization : OFF

Intelligent Zoom Stabilization : ON

Visibility Enhancement Technology (OP Software)

i-PRO Management Software is not only used for removing fog but also snow, rain, and other natural conditions that can harm video quality.

Besides real-time image processing during monitoring, post-processing is also possible after the images are saved to the recorder.

Before Correction

After Correction

ClearSight coating

Water drops stick to the dome cover on conventional cameras and hinder the shooting of clear images.

Our ClearSight coating models are coated to repel water drops in order that the camera captures clear images when it is raining.

This coating is also effective at repelling dirt, which reduces the frequency of needing to clean the dome cover.

The hydrophilic coating can also be touched without special equipment and improves the ease of maintaining the equipment.

Coated areas are resistant to water droplets	Coated areas are resistant to dirt	IR Surveillance in the Rain
Non-coated ClearSight coated	Non-coated ClearSight coated	Non-coated ClearSight coated

EXTREME Visibility

PTZ (Pan-Tilt-Zoom) cameras and omnidirectional cameras enable wide-area monitoring. Multiple cameras can be combined for more efficient monitoring and to eliminate blind spots.

PTZ Camera for Wide Range Monitoring and a High Zoom Ratio

Normal fixed lens cameras can only monitor in a certain direction, but the lens of a PTZ camera can be operated remotely to switch to the direction you want to view. Detailed areas can also be zoomed in to a maximum of 40x.

Since the cameras can be infinitely rotated 360 degrees at a high speed of 300 degrees/sec, you will not miss the subjects you want to monitor.

Advanced Auto Tracking

The pan, tilt, and zoom functions can be combined for automatically tracking the movement of a subject. If the tracked subject moves out of the camera's shootable range, notification is sent to other cameras so that the tracking process can be carried on without interruption.

360-degree Monitoring

The 360-degree Network Camera can capture images around the camera lens in all directions. Available modes include Fisheye, Double Panorama, Panorama, Quad PTZ, and 4 Stream, and the camera can output video images based on the selected video mode for reduced loads on the viewing system.

De-warping

The 360-degree Network Camera can generate and output video images for each mode within the camera unit. Also, the Network Disk Recorder (WJ-NX400*/WJ-NX300*/WJ-NX200*/WJ-NV300) or i-PRO Management Software (WV-ASM300*/WV-ASM200) can be used on 360° omnidirectional images captured by Fisheye Mode to convert to a format that is easier to view, such as Quad PTZ. Because the 360° omnidirectional video image is stored in the recorder, nothing is missed within the viewing area.

*Feature update

In addition, the area that you want to view can be selected using a controller or mouse to allow you to automatically move the viewing spot for patrolling the area.

Even during patrolling, areas not visible on the screen are all stored in the recorder in Fisheye Mode so that nothing is left unseen.

The Pan-Tilt of the 360-degree Network Camera does not use mechanical components, and so provides a smooth movement without the mechanized wear that could adversely affect camera longevity.

EXTREME Compression

Compression of high-resolution image data is used to reduce network bandwidth, data storage, and server load costs, while maintaining high quality.

H.265 Compression + Smart Coding Technology

Combining H.265 Compression with Panasonic Smart Coding Technology reduces bandwidth by maximum 95%* of conventional H.264 Compression.

This security system maintains the quality of moving images while reducing bandwidth and storage costs.

*Value in Advanced mode with Smart Facial Coding. It depends on the scene.

GOP Control

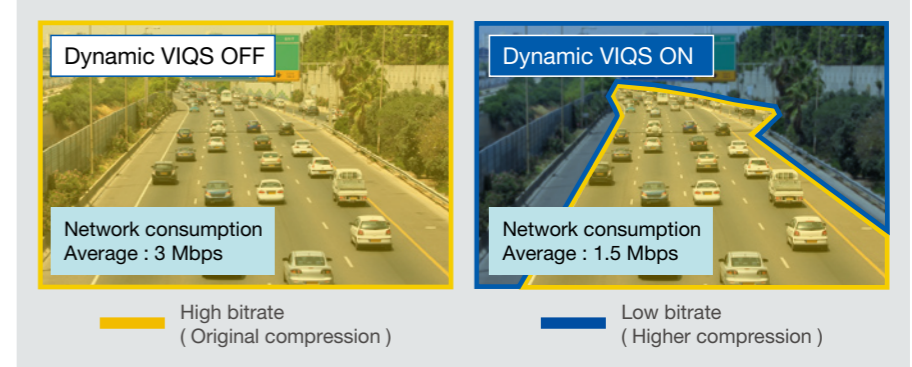

The GOP (group of pictures) control can reduce the total transmitted data of images with little motion by controlling the transmission interval of I-Frame, which is heavy in data.

If the motion is significantly low, the transmission interval can be set to 60 seconds to drastically reduce the total data transmitted.

Auto VIQS

Auto VIQS detects movement within the image and compresses areas with little motion to reduce transmitted data while maintaining the quality of the image.

Face Compression

The camera automatically distinguishes the sections of the images that are important such as moving objects and people's faces. The quality of unimportant areas is reduced without compromising the quality of important sections, therefore optimizing the data size of the footage.

On top of integrating Smart Coding into the conventional GOP Controls, the improved compression efficiency through Auto VIQS and Long-Term Compression combined with Smart Facial Coding, which detects faces and maintains the quality of only faces, can compress the file drastically to reduce the data size.

EXTREME Data Security

In addition to Data encryption and communication encryption, provide secure network access between trusted devices through device certification then prepare for the threat of advanced cyber attacks.

End-to-End Data Protection Solution

End-to-End Secured System

End-to-End Data Encryption

- Support encryption communication
- Camera-encrypted recording at the edge

Pre-installed Symantec Device Certification

- Communication encryption
- Video tampering detection

FIPS140-2 Level 1 CAVP* compliant

(Federal Information Processing Standardization)

- For federal/public safety usage

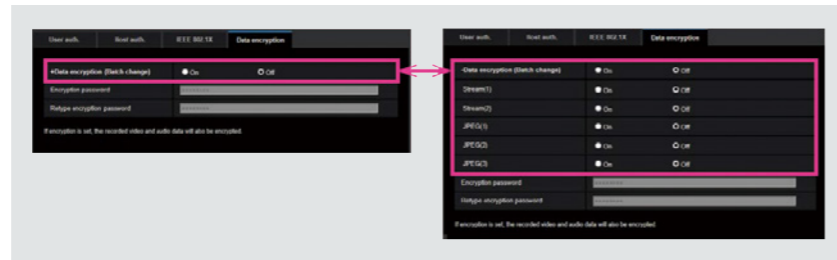

*Evaluated by WV-TW370P

Data encryption

The data encryption function encrypts data to prevent information leakage due to unauthorized access to the camera and theft of the SD card.

If you confirm streams with data encryption set to "On" on the "Live" page, password entry for decryption is displayed. If you correctly enter the "Encryption password" that was set, you will be able to view images.

SD Memory Card Recording

Without using a network, footage can be saved directly to the camera by inserting a SD memory card (SD, SDHC, or SDXC) in the camera. The WV-SFV631L and other models are equipped with two SD memory card slots for longer recordings.

Settings can be adjusted to only record images to the SD memory card when the alarm is triggered.

Inserting SD memory cards also works as a backup system when there is an issue with the network.

Images will be saved onto the memory cards while the network is down and will be transmitted to the recorder when the network reconnects.

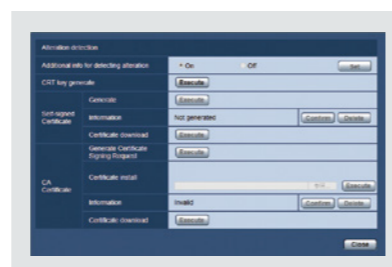

Detect Alterations to the SD Memory Card

Turn on the Alteration Detection and record images to the SD memory card to be able to verify whether or not the recorded images have been altered.

Playback the images recorded onto the SD memory card with a computer and utilize the Integrity Verifier Tool to analyze the raw data and confirm that the recorded images have not been altered. Download the Integrity Verifier Tool for free from our "Useful Tool" download page.

<https://security.panasonic.com/download/tools/#iv>

EXTREME Reliability

Achieves high endurance and long life in storing information even under harsh environments.

HDD Dynamic Power Control

Long life and high reliability is achieved through technology that individually controls access to the HDD. If a recorder needs to recover crashed data, it can do so in a short amount of time.

Individually-managed HDD

WJ-NX400 manages the status of each HDD, using the following three states:

1 Active state: Currently being accessed by the WJ-NX400. **2 Idle state:** Ready to be accessed **3 Stand-by state:** Halted motor

- Active** : Motor - On; Head - Read/Write
- Idle** : Motor - On; Head - Home Position (ready for next access to a HDD)
- Stand-by** : Motor - Off; Head - Home Position

Auto Failover Recording

NVR has an Auto Failover Recording function to reduce the loss of recorded data due to NVR failure.

In the case of an NVR failure, the stand-by NVR will begin recording automatically.

The standby NVR will record instead of the failed NVR, without the need for management software.

High Performance and Flexibility with TURBO-RAID

WJ-NX400 RAID is a specialized hardware RAID (TURBO-RAID).

WJ-NX400 RAID, equipped with TURBO-RAID, maintains the throughput performance of a non RAID configuration. TURBO-RAID can provide guaranteed reliability of data and high-performance throughput.

The recorder can recover data quickly in the event of a crash.

*To use TURBO-RAID with WJ-NX300, Additional RAID Kit is required.

Heavy Salt Damage Resistance, Compliant with ISO14993

Heavy salt damage resistance, with film thickness of 100 micrometers or more, provides protection from salty wind corrosion.

The use of screws with an anti-salt surface treatment prevents trouble occurring from corroded screws in the product.

Rainwater Protection

IP66 standard The outdoor models have waterproof and dustproof structures that are rated IP66 for exterior installations, eliminating the need for special housing and/or waterproof protection.

Vandal Resistant

When installed in locations that are prone to vandalism and tampering, measures are required for preventing damage to the camera. Models featuring the Vandal Resistant mechanism are ideal for installation in these types of locations.

Vandal resistant mechanism

Models featuring the Vandal Resistant mechanism include a shock absorber around the internal lens. Even if the dome cover is subjected to a potentially damaging impact, the shock absorber will absorb this impact to protect the internal structure from damage.

EXTREME Analytics

Identifies and acquires important information, improves accuracy and efficiency of the entire system, reduces system load, and lowers costs and hurdles. Anyone can take advantage of Analytics.

Face Recognition System

When the camera detects a face, it sends only the facial image data to the server. This greatly reduces the load on the system's main server and enables one system to accommodate up to 20 cameras. The accommodation of so many cameras makes it possible to have multiple-camera coverage extending across a wide area, thereby enabling people-flow paths to be determined and easily tracked in real time.

Face search and face matching functions

The Facial Recognition System takes the camera-captured facial images and compares them with registered faces, sounding a real-time alarm and displaying comparison results on a screen when a match is found.

By using the comparison results to do a facial-image search, it is possible to display the results from each camera as a time series to identify and track a person's movement.

In addition, it is possible to filter recorded images using camera name and date/time, and then determine a subject person's movement by using the alarm history list to replay recorded images linked to an alarm.

People counting and age and gender statistics functions

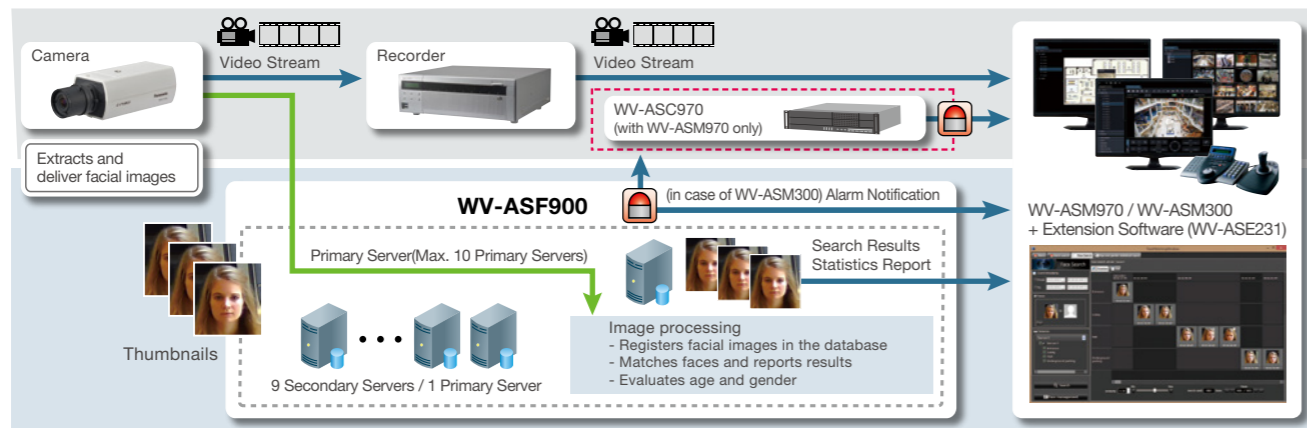

In order to acquire age and gender data on visitors to a store or other facility, the Facial Recognition System uses camera-captured facial images to evaluate age and gender and calculate counts.

This data can be displayed on statistical graphs and saved as a CSV file.

*CSV file: A file that can be edited using a spreadsheet software such as Microsoft® Office Excel®

Example of a Basic Connection System

Vehicle Incident Detection

The Vehicle Incident Detection function detects incidents such as wrong-way driving and stopped vehicles, and then alerts the Traffic Management System.

While it is difficult for a single human operator to physically detect vehicle accidents on multiple camera monitors, such monitoring is made possible with the Vehicle Incident Detection system.

*Extension software WV-XAE100W is required.

Intelligent VMD

Video motion detection

The camera itself features intelligent functionality for notifying the administrator about changes to situations or dangers using a variety of methods. This eliminates the need to constantly watch the screen in the control room for reducing the TCO. *Extension software WV-SAE200 is required.

Intruder

Type1 / Type2 / Type3 / Type4 / Type5

It is possible to issue an alarm when a moving object enters the area. Up to 8 objects, or 32 objects (Type3 / Type5 only) can be detected simultaneously per channel.

Loitering

Type1 / Type2 / Type3 / Type4 / Type5

It is possible to issue an alarm when a moving object enters the area and stays for the specified period. Up to 8 objects, or 32 objects (Type3 / Type5 only) can be detected simultaneously per channel.

Direction

Type1 / Type2 / Type4

It is possible to issue an alarm when a moving object enters the area and moves to the specified direction. Up to 8 objects, or 32 objects can be detected simultaneously per channel.

Cross line

Type2 / Type3 / Type4 / Type5

It is possible to issue an alarm when an object moving to the specified direction crossed the line. Up to 8 objects, or 32 objects (Type3 / Type5 only) can be detected simultaneously per channel.

Object

Type2 / Type3 / Type4 / Type5

It is possible to issue an alarm if an object (suspicious object, etc.) is left behind in the area or taken away from the area. Up to 8 objects, or 24 objects (Type3 / Type5 only) can be detected simultaneously per channel.

Scene change

Type1 / Type2 / Type3 / Type4 / Type5

It is possible to issue an alarm when a camera is covered with something or the camera direction is changed to shoot a different subject.

People Counting

Type3 / Type5

It provides function of counting the number of people who crossed the line in a certain direction which is set with "Line".

Heat-map

Type3 / Type5

Heat-map provides statistical information of traffic lines. Counts up both passing and loitering in the shooting area.

MOR (Moving Object Remover)

Type3 / Type5

MOR is a privacy-conscious function which removes people from the image and only send the background image.

Support for Various Installation Environments

Panasonic network cameras are available in a full lineup of products custom-tailored for a wide range of installation environments.

Their specialized design also helps to reduce the work required for installation.

• Select the Specialized Model for Your Installation Environment

Temperature protection for outdoor installations

Models can be selected to match your specific installation conditions and can be installed in environments with temperatures ranging from +60°C to -50°C.

*The supported temperature range varies depending on the specific model.

Dehumidification Device

The network camera outdoor models have a built-in dehumidifier device to lower the internal humidity for preventing cloudiness due to condensation.

This eliminates blurry video images caused by clouding of the camera dome cover when installed in locations with high humidity or extreme temperature changes over the course of the day.

Easy Installation

The Easy Kitting Package makes setting up the camera easy. Users do not even need to remove the camera from the box to setup the camera.

This packaging helps reduce the time and effort it requires to install multiple cameras.

On outdoor models, the RJ45 Joint Connector removes the need of using waterproof tape and reduces the time it takes to install the camera.

Onboard Model

A lineup of network cameras is also available with anti-vibration and other specific features for installation in cars, buses, and other vehicles.

The WV-SBV131M, WV-SBV111M, WV-SFV130(M), WV-SFV110(M), WV-SW158, WV-SW155MA, WV-X4571L(M), WV-S4550L(M), WV-SW458MA, and WV-SFV481 are compliant with the EN50155 European railway standards.

Support for Various Installation Environments

Mount on the Outside of the Vehicle

The rugged mobile network camera WV-SBV131M, WV-SBV111M meets the United States Department of Defense Military Standards MIL-STD-810G to withstand even the harshest of environments.

Also meeting the highest International Protection Standards IP6K9K, the camera is dust tight and waterproof.

Meeting such standards allows the camera to be mounted on the outside of busses and trains, which are constantly shaking and rained on.

The lenses' hard coated surface allows the vehicle to be put through a carwash.

Capable of withstanding temperatures ranging from -40 °C and up to +60 °C (-40 °F and up to 140 °F) the camera is highly versatile.

WV-SBV131M / WV-SBV111M

Reduced Installation Time

The i-PRO Series cameras include a number of features for reducing the time required for installation.

If you want to change the camera direction after installation, the camera direction can be changed in 90° steps without removing the base (EXTREME models).

The dome cover can also be easily removed to change the direction of the lens.

For Outdoor Box type cameras (EXTREME models), the stay can be bent to one of two levels to allow installation with a high degree of freedom.

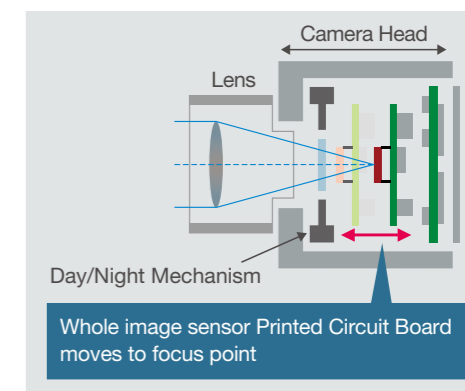

ABF (Auto back Focus)

The ABF feature automatically adjusts the image sensor position when changing from color to B/W mode, optimize the back focus required for clear, sharp images.

In addition, the one-push Auto Back Focus feature sharply reduces the time required to focus cameras during installation, allowing focus to be set using the optional system controller.

The ABF function can also automatically sense and adjust to slight focal length changes due to parts warping caused by temperature changes in the area where the camera is installed.

Special Screws for Added Security

Specially-shaped screws are used to secure the cover to prevent tampering with the camera or theft of the SD memory card.

Delivering sharper images with higher sensitivity. Featuring a more intelligent solution. Introducing the 360-degree Network Camera!

5 m

*Sample screen from 9M Fisheye mode

Extreme image quality for evidence capturing under challenging conditions

For human faces and objects at the edge of fisheye images, the 360-degree Network Camera can produce clear, low-distortion video. In addition, in installation environments with large brightness differences, such as building entrances where an arriving person moves from an exterior bathed in direct sunlight to an interior that is dark, the camera increases the brightness of dark areas and reduces the brightness of bright areas in order to produce natural-looking images with clear, easy-to-see faces.

With the 9MP model, ABF feature optimize the back focus required for clear, sharp images.

With the outdoor model, clear black and white images are generated so you can acquire the necessary information even in dark 0 lux environments.

These cameras feature high durability in severe environments (vibration/shocks, temperature fluctuations, high humidity, etc.), and they meet railway standard EN50155, water-resistance standard IP66, and shock-resistance grade IK10.

Extreme H.265 compression with new Smart Coding*

While maintaining video quality, the 360-degree Network Camera can greatly reduce data volume by supporting H.265 compression and by doing data compression tailored to the amount of movement in the video.

Even in cases where a network video recorder records video data from multiple cameras, the burden on the network can be reduced and the data can be saved for longer periods by not wasting recorder storage capacity.

*Face Compression not included.

Complete with powerful intelligent functions

Heat-map*

Heat Map

This provides visualization of the traffic patterns by people and how long they stay in one place. For example, you can place products based on how people tend to flow within the store and arrange objects so that they do not interfere with the movement of people.

*Extension software WV-SAE200 is required.

People Counting*

People Counting

This counts the number of people passing through a selected preset location. The People Counting function can provide statistics on the number of people entering and leaving a specific zone and other useful data.

*Extension software WV-SAE200 is required.

MOR (Moving Object Remover)*

MOR

Moving Object Remover

Enables monitoring of changes only to the surrounding environment by removing people and other moving objects from the video. This function can be used with camera images for confirming how products placed in a salesroom are selling while also respecting the privacy of customers in store surveillance.

*Extension software WV-SAE200 is required.

New Aerodynamic PTZ with EXTREME PERFORMANCE - under - EXTREME CONDITIONS

AeroPTZ Suitable for mission critical tough operations under arctic-to-desert weather, salty gust winds, and heavy vibrations

● Vibration Resistant Construct

In order to capture stable images, Hybrid image stabilizer (Video SAS technology) reduces vibrations when large vehicles pass and swaying on top of bridges.

● Wind Resistant

The camera continues to function even during hurricanes and typhoons of wind speeds up to 216 km/h (135 mph)* (operation).
* Upright position
The camera will not be damaged by winds up to 288 km/h (180 mph) (non-destructive).

● Salt air resistant

The Glass Fiber Body will not be corroded by salt in the ocean breeze. ISO14993 Compliant.

● Waterproof IP66 & IP67 Standard

The camera can be installed in locations that are frequently wet with heavy rainfall, flood occasionally, or are sprayed with strong spurts of water.

IP66
standard
IP67
standard

● Sustains Harsh Environments

The camera continues to function in extremely cold (-50 °C) and extremely hot (+60 °C)* environments. (Defroster & Dehumidification Device)

*Natural Silver model only. Gray & Brown model up to +55 °C.

● Vandal Resistant

Meets IK10 Standards and is impact resistant.

With optional IR LED Unit

Wiper & Washer

The Wiper & Washer removes water and dirt that may blur images. Always monitor crisp and clear images.

Easily Adjust the Direction of the Camera

Use the 360°endless pan and tilt functions to easily adjust the direction of the lens, automatically survey a preset area, or combine the camera with an external sensor to automatically adjust the direction of the lens towards a detected abnormality. Even monitor directly under the camera.

(Front Tilt 45° to Monitor Directly Under the Camera)

Capture High-Resolution, Smooth & Natural Images

FULL HD Full High Definition 1080/60p
Full HD (1920 x 1080), 60fps

Anti-severe weather PTZ network camera

WV-SUD638

Ultra-high 4K picture quality for detailed, wide-area monitoring with a single camera. Fewer cameras also means a substantially lower total cost of ownership.

4K
ULTRA HD

4K Vandal Resistant
Weatherproof Dome Network Camera
WV-SFV781L

4K Vandal Resistant
Weatherproof Network Camera
WV-SPV781L

Ultra high-definition, 4K picture quality

Ultra HD 4K cameras offer 27 times the resolution of conventional analog cameras (VGA), nine times that of standard HD (1,280 x 720) and four times that of Full HD (1,920 x 1,080). This means that the finer details of images remain clear even when you need to magnify only a part of the image. The high performance lens used by Panasonic's 4K cameras provides uniformly high-resolution images from the center out to the edges.

Cropping Function

A given area within a single image can be selected, cropped and displayed. For example, areas with high monitoring priority, such as a parking garage entrance or a hallway, can be selected and displayed for easy viewing. You can still keep an eye on the overall image while also focusing on specific areas.

With PTZ cameras, when the lens is pointed in a single direction, other areas go out of view during that time, but with a 4K camera you can monitor the entire area while also watching specific areas requiring more focused monitoring.

Wide-Area Monitoring

A single 4K camera can effectively monitor a wider area, which allows you to reduce the total number of cameras while also eliminating blind spots. Monitoring can be performed not only at vertical and horizontal angles, but for deeper depths as well.

And, even when monitoring within the same area, 4K's increased range means that the number of units required is reduced substantially compared to that of conventional cameras. This translates into reduced costs for the cameras themselves, less installation time and labor, and lower maintenance costs.

4K-ready monitors can also reduce the number of monitors needed in the control room.

Low Light Ready

The camera's ultra-high 4K resolution allows it to capture color images in dim, low-light conditions. In even darker conditions, the camera can use its monochrome inversion function to switch to black-and-white images, and in zero-light conditions it can accurately display what is happening in front of it using infrared LED vision.

Light near subject : 1 lux

High-power 6x zoom lens with an ultra-wide angle of 100°

An optical 6x zoom lens comes standard. The viewing angle range and zoom power can be set in line with conditions where the camera is installed. Using a proprietary 3-drive lens system, Panasonic has developed a high-power 6x zoom lens with an ultra-wide viewing angle of 100°, a type of lens that is extremely difficult to produce using conventional optical design methods. The lens is capable of capturing an extremely wide area, allowing effective 4K coverage of outdoor areas.

- Ultra-wide-angle 100° : Wide-angle monitoring of parking lots, stadiums etc. utilizing 4K resolution
- Telephoto 17° : Monitoring of individuals or crowds from a distance.

This is the Panasonic difference!

Panasonic's "True 4K Technology"

• Panasonic's Proprietary 3-Drive Lens System

The i-PRO TRUE 4K NW Camera is equipped with Panasonic's proprietary 3-drive lens system, which simultaneously drives two zoom lenses and one focus lens. Having three lenses all driven independently allows them to be smaller and their drive areas reduced, and has thus enabled us to make the camera compact enough to fit in a standard camera body while providing a high-power 6x zoom with high 4K picture quality viewed from an ultra-wide-angle of 100°.

• Refined Resolution and Superior Contrast for a Higher Level of Video Imaging

In order to create a sharp, clear texture, 12 lenses in four groups are used to provide the ultra-high resolution expected of 4K in every part of the image, from center to edge. Both a higher level of representational precision and a more compact lens system are achieved. Plus, all lenses are glass, while aspheric lenses are also used extensively to reduce aberrations to the ultimate degree. The clear depiction, sharp resolution and beautiful color reproduction necessary for true 4K monitoring have all been successfully achieved.

Easy Installation

Various design features have been added to shorten installation times.

The camera has also been designed to be capable of pointing in the preferred direction at the preferred location.

Dome Type WV-SFV781L

When attached to the mounting plate, the camera's direction can be easily changed at intervals of 90°.

Rotating the viewing area around the lens further allows the lens to be pointed in the desired direction.

The combination of a 6x optical zoom and autofocus also shortens the amount of time required for fine tuning the installation.

Box Type WV-SPV781L

A total of three adjustment points on the camera base and arms enables its position to be fine tuned to allow accurate pointing.

Network Products

Network Video Recorders

Server based recording and video management platform WV-ASR500 Series

- Open platform, Panasonic's and over 70 other vendors network cameras support.
- Up to 128 network cameras can be connected and recorded.
- Up to 16 clients can monitor image and control WV-ASR500 simultaneously. (Depends on system structure, environment.)
- Various Recording Modes: Schedule, Event (Pre/Post)
- Graphical Timeline Search function (with WV-ASC970 System)
- Mobile monitoring applications for smart phone (iOS, Android)
- Cooperative with the Face Matching System (with WV-ASC970 System or WV-ASM200)
- Supports archiving function to realize long-term recording

Advanced configuration

Mobile monitoring Provided by WV-ASR500

- <System expansion options>
- Facial Recognition Analytics platform (WV-ASF900 Series)
 - 3rd party network cameras

Network Camera Recorder with Viewer Software **BB-HNP17** Limited quantity

- Supports the recording and playback of H.264 cameras
- Supports resolutions of 2,048 x 1,536
- Remote Access Function
- Up to 64 cameras Register
- Event Detection Recording
- Flexible Layout
- Preset Sequence
- Timer recording with preset designation
- Pop-up display
- Time specified color night view

Network Products

Plug-in Software

Plug-in Software for Vehicle Incident Detection **WV-XAE100W**

Camera detects vehicle incidents on the road with video analytics technology.

The camera detects incidents such as wrong-way-driving and stopped vehicles, and then notifies the Traffic Management System of such occurrences by alarm. This enables prompt recognition of incidents without the need for round-the-clock monitoring of multiple camera images.

Plug-in Software for i-VMD **WV-SAE200**

WV-SAE200 is plug-in software for activating the i-VMD(Intelligent video motion detection) function and Face detection function. Intelligent Video Motion Detection(i-VMD) is possible to detect objects in the specified area by advanced video analysis technology.

Network Products

360-degree Network Microphone

WV-SMR10

(12V DC or PoE)

- **360-degree audio monitoring**
With microphone arrays, 360-degree audio monitoring from a specified direction is possible.
 - **Specifying a desired direction on a camera image**
While watching the 360-degree Network Camera image, audio from the desired location can be freely specified by clicking on that location.
 - **Synchronizing with the Network Disk Recorder**
After recording audio to a Network Disk Recorder*, the sound collecting direction can be specified while playing back the recorded image of the 360-degree Network Camera.
- *Models WJ-NX400, WJ-NX300, WJ-NX200, WJ-NV300 and WJ-ND400 are supported
- **Can be installed with a 360-degree Network Camera as one unit**
The microphone can be neatly installed in one place by integrating it with a Panasonic 360-degree Network Camera.

System Example

Optional Accessories

- Ceiling mount bracket WV-Q105A
- Ceiling pendant type mount bracket WV-Q117A

Network Products

Management Software

IP Matrix Server Software **WV-ASC970** IP Matrix Client Software **WV-ASM970** Extension Software **WV-ASE901***(Monitor the status of Fire Alarm System) / **ASE902** / **ASE903** / **ASE904** / **ASE905**

Optional Accessory
Ethernet System Controller with 3D-Joystick & Jog/Shuttle **WV-CU950**

Easy and smooth integration from analog to IP system

- WV-ASC970**
- Flexible system design: Analog, IP, and Hybrid analog/IP
 - Up to 64 recorders, 1,024 monitors, and 2,048 cameras (in case with encoder) can be registered
 - Camera/Sequence/Monitor selection, Camera control and Recorder control can be made with the optional system controller WV-CU950
 - Supported Recorders: WV-ASR500 Series, WJ-NX400 series, WJ-ND400 series, WJ-NV200 series, WJ-NV300 series, WJ-HD616/716 series
 - Redundant function supported (Redundant function can consist of 2 WV-ASC970 servers as Main server and Standby server)
- Extension Software WV-ASE901***
- Monitor the status of Fire Alarm System.
 - Manually reset or acknowledge fire alarms and faults of Fire Alarm System.
 - Search history of fire alarm, faults and interlocking of Fire Alarm System.
- * WV-ASE901 is only sold in certain areas. Please contact the sales company for details.

- WV-ASM970**
- Multi-Monitor option enables simultaneous use of Operation screen and Monitor screen (1 / 4 / 7 / 9 / 10 / 13 / 16 split) on a dedicated monitor. Two monitor operation is also available.
 - Up to 30 ips/camera can be displayed in 16 split-screen in MPEG-4 2 Mbps mode (depending on the camera, camera setup and PC performance).
 - Up to 30 ips/camera can be displayed in 16 split-screen in H.264 1.5 Mbps mode with VGA (depending on the camera, camera setup and PC performance).
- Extension Software WV-ASE902**
- Up to 4 live monitor
 - Multi monitor function up to 5 PC monitors
 - To display the operation window and 4 live windows simultaneously
- Extension Software WV-ASE903**
- Visibility Enhancement Function
* Same as WV-ASE205 below.
- Extension Software WV-ASE904**
- Controlling Video Insight server
- Extension Software WV-ASE905**
- The cropping function of 4K video.

i-PRO Central Management Software **WV-ASM300**

Extension Software **WV-ASE202 / ASE203 / ASE204 / ASE205 / ASE306**

Optional Accessory

Easy setting : New WV-ASM300 software enable a whole setting from camera configuration to recorder configuration.

- Up to 100 recorders, 64 encoders and 256 directly connected cameras can be registered. Up to 6,400 cameras registered in the recorders and 256 cameras registered in the encoders are automatically registered in the WV-ASM300 (the number of the cameras depends on the recorder and encoder).
 - Encryption of SSL and data encryption support latest "AES-256bit key" strong encryption
 - MP4 data direct download from WJ-NX400, WJ-NX200
 - When used with WJ-NX400 series, VMD, thumbnail search can be operated.
- WV-ASE202**
- Expand the maximum numbers of screens to 64.
 - Up to 4 live windows.
 - Multi-monitor function using up to 6 PC monitors.
 - To display the operation window, the map window and the 4 map windows simultaneously.
- WV-ASE203**
- Expand the maximum numbers of registered recorders, encoders and cameras to 100, 64 and 256 respectively.
 - Up to 4 licenses for the WV-ASE203 can be added.
- WV-ASE204**
- Decoder registration: Up to 10 decoders

- 1-screen/4-screen PTZ compensation function (hereinafter compensation function) from the fish-eye images of the Panasonic Fisheye network cameras
 - Supports 360-degree Network Microphone (WV-SMR10)
 - Selecting the camera icon in map window, a still image of the camera is overlaid.
 - Live window, Map window in addition to the Operation window (3 monitors)
 - Control using the Ethernet System Controller WV-CU950
- * To use the multi-monitor function, it is necessary to install an additional video card on the PC in use.

WV-ASE205

- Visibility Enhancement Function

Spatial Tonal Correction

Snowfall and Rainfall Noise Reduction

Multi-frame Synthesis Noise Reduction

Spatial Tonal Correction, Snowfall and Rainfall Noise Reduction

Extension Software WV-ASE306

- Controlling Video Insight server

Limited quantity
i-PRO Management Software **WV-ASM200**

Extension Software **WV-ASE201**

Optional Accessory

Face Recognition System
WV-ASF900 Series

Additional Camera Kit
1ch : WV-ASFE901 / 4ch : WV-ASFE904

Face Recognition System running in the video surveillance system

- Add-on face matching function: Add the face matching function by simply adding the necessary devices and the software
- Can be connected up to 20 cameras on a server.

Face search

- Face images that camera detected are stored, and it can be searched later.
- By searching the face DB, you can display the result of each cameras in chronological order and find movement locus of persons.
- Specify camera or date in detected face images and display the result in the list in similarity order.

Face Matching

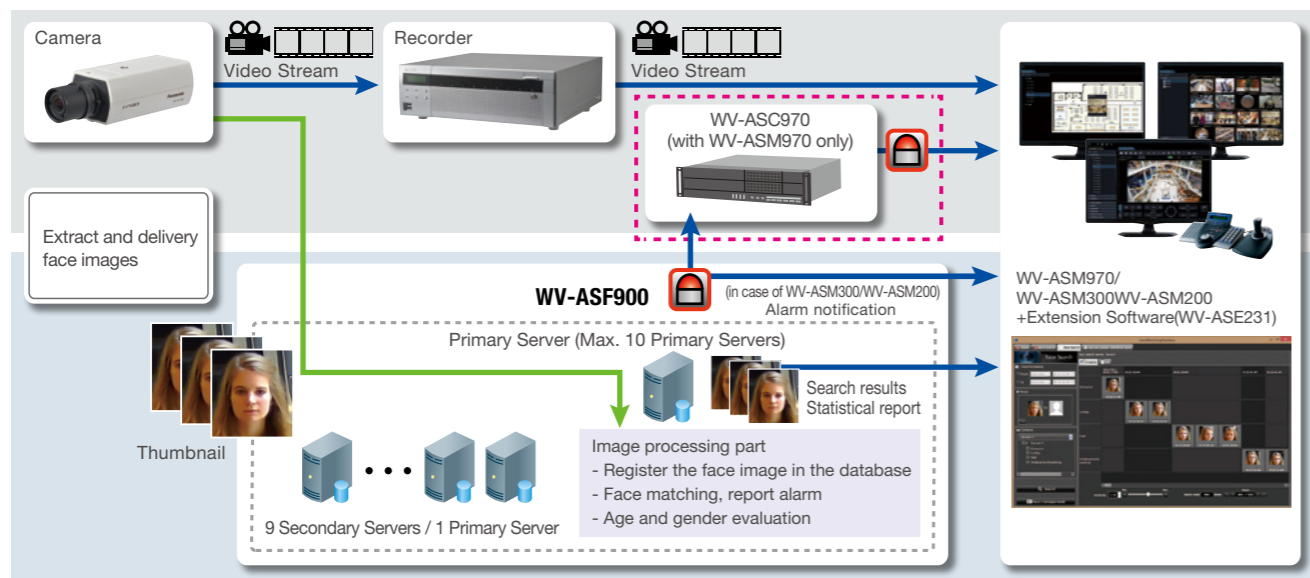

- When it is matched with registered people, alarm of face matching is output in real-time, and display an alarm history in the list.
- Specified screen image can be played back on control monitor with double-clicking on an alarm history.

People counting, Age and Gender Statistics

- Count people of detected face and evaluate their age and gender
- Display the result on the screen with statistical graph
- The statistical data can be saved as a CSV file for analytical use.

Basic System Connection Example

Extension software

WV-ASE231 for WV-ASM970 / WV-ASM300 / WV-ASM200

- To use the WV-ASF900, WV-ASM970, WV-ASM300 or WV-ASM200 with extension software WV-ASE231 is required.
- Extension Software for Facial Recognition Analytics Platform (WV-ASF900)
- Face Matching / Face Search / People counting results display on WV-ASM970 / WV-ASM300 / WV-ASM200 screen
- i-VMD (Intelligent Video Motion Detection) tracking path display on WV-ASM970 / WV-ASM300 / WV-ASM200 screen

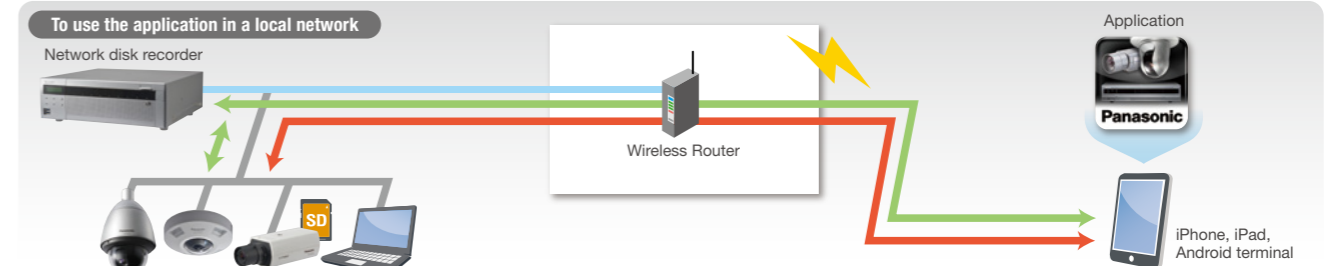

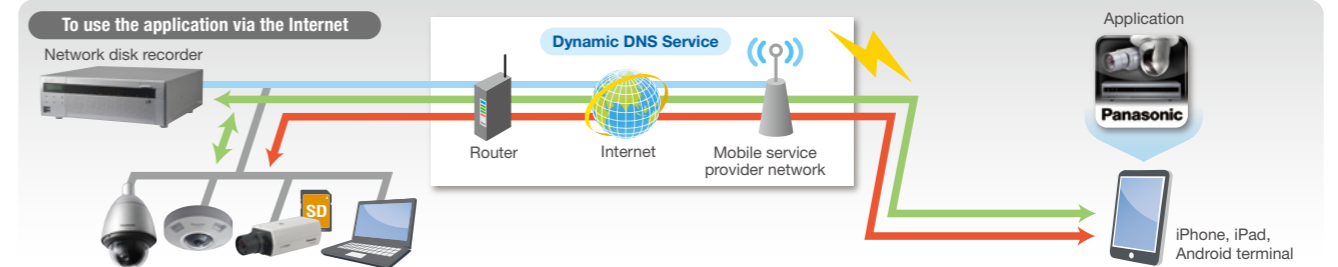

Panasonic Security Viewer

Introduction of the application

Panasonic Security Viewer is an application that can view the images from i-PRO Series Network Cameras, Network Disk Recorder. By connecting a terminal to a 3G/4G or wireless LAN (Wi-Fi), it is possible to view live images from cameras registered on the recorder and recorded images stored on recorders.

Preface

To use the **Panasonic Security Viewer** via the Internet, it is recommended to register in the Dynamic DNS (DDNS) service.

A PC is required to register a Dynamic DNS Service and configure the settings of the router.

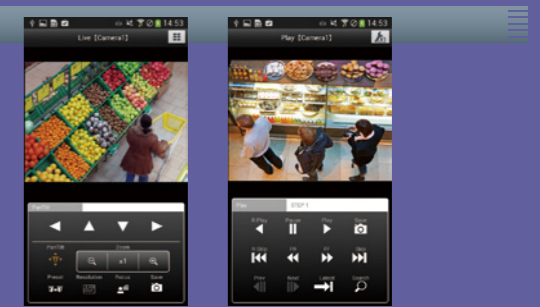

WJ-NX400 / WJ-NX200 / WJ-NV300 can transcode image size/bit rate to fit the customers environment, and stream it. This mode can be used by WJ-NX400 / WJ-NX200 / WJ-NV300 only.

- Download the Panasonic Security Viewer application on the Google play™ store, Apple App Store.

Features of the application

- Network disk recorder**
- Live image: Live images from the network cameras connected to the recorder
 - Playing back recorded images: To play back the images stored on the recorder
 - Mobile Playback feature (WJ-NX400 / WJ-NX200 / WJ-NV300)
 - Time & date search: To search the images to play back based on the time & date
- Network camera**
- Network camera control* (Resolution switchover, focus, panning / tilting, zoom, preset position switchover)
 - Playing back recorded image in the SD memory card*
- * Depends on the network camera functions.

Android™

Outline of the application

Application name	Panasonic Security Viewer version 3.2
OS	Android™ OS 4.0 - 6.0
How to get the application	Download from the Google play™ store.
Date to start the service	June-2017
Operation check terminals	Galaxy S2, Galaxy S3, Galaxy S4, Xperia Z1, Xpeira Z5, Nexus5, Nexus5X, Nexus7, Nexus9, ASUS ZenPad

- Download the application from here.

Android™ <https://security.panasonic.com/android/>

iPhone / iPad

Outline of the application

Application name	Panasonic Security Viewer version 3.2
OS	iOS 8 or later
How to get the application	Download from the App Store.
Date to start the service	June-2017
Operation check terminals	iPhone5, iPhone5S, iPhone6, iPhone6 Plus, iPhone6s, iPhone7, iPad Retina, iPad Air, iPad mini

- Download the application from here.

iPhone / iPad <https://security.panasonic.com/ios/>

Easily migrate to an advanced IP system while still using the existing assets of your analog system

Effective utilization of analog cameras

Encoder

- Analog cameras can be connected to the IP network simply by connecting them to the encoder.
- A maximum of four analog cameras can be connected to the WV-GXE500, and one analog camera can be connected to the WV-GXE100.
- Video captured by analog cameras can be saved to a recorder installed on the IP network in the same way as network cameras.

Basic System Connection Example

4 CH H.264 Video Encoder

WJ-GXE500

(12 V DC or PoE)

Optional Accessory

EIA 48.26 cm (19 inch) Rack Mount Bracket
WV-Q204/2S
(for mounting three WJ-GXE500)

1 CH H.264 Video Encoder

WJ-GXE100

(12 V DC or PoE)

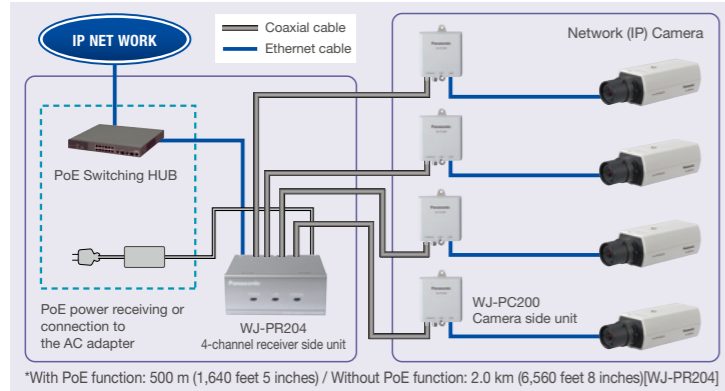

Effective utilization of cabling

Coaxial-LAN Converter

- The coaxial cables of existing analog cameras can be used for expanding the reach of the IP network.

Basic System Connection Example

*With PoE function: 500 m (1,640 feet 5 inches) / Without PoE function: 2.0 km (6,560 feet 8 inches)[WJ-PR204]

Coaxial LAN cables can be used up to distances of 2.0 km.[WJ-PR204]
Power can also be supplied to PoE cameras for distances of up to 500 m, PoE+ cameras for distances of up to 300 m.

*Distance will vary depending on the power supply environment. Please refer to the spec sheet for details.

Coaxial-LAN Converter with PoE function

4-channel receiver side unit

WJ-PR204

1-channel receiver side unit

WJ-PR201

(Indoor use only)

Camera side unit

WJ-PC200

Receiver side unit

Camera side unit

Optional Accessory

Rack Mount Connecting Fitting
BY-HCA10A
(for mounting three or four Receiver side unit)

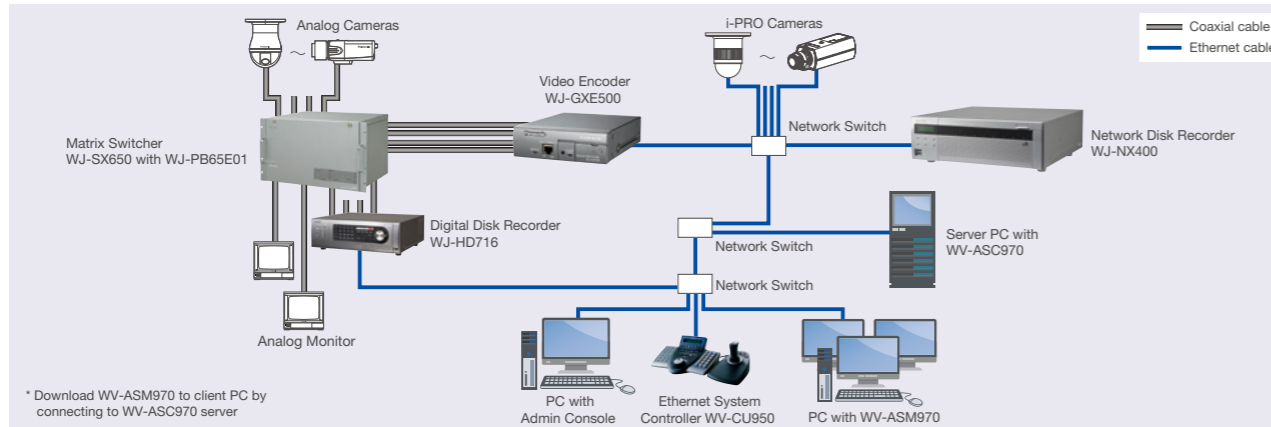

- For U.S. and Canada : BY-HCA10A
- For Europe and other countries : BY-HCA10CE

IP and analog integrated hybrid system

- The WV-ASC970/WV-ASM970 can be used to integrate management and operation of centralized systems that use both analog and IP system components.

Basic System Connection Example

* Download WV-ASM970 to client PC by connecting to WV-ASC970 server

This is the Panasonic difference!

With our proven track record of success in both analog and IP cameras, Panasonic can provide a one-stop equipment and system solution for successful migration from analog to IP.

Store Medium-sized Supermarket Chain

01 Reasons for Implementing System

- Increasing numbers of shoplifting incidents were beginning to seriously affect store profitability.
- In particular, the impact of losses from habitual shoplifters was extremely high.
- When disagreements arose with customers over the amount of change received, no method of factual verification was available.
- There was a high risk of foreign object contamination of foods, and it was becoming increasingly difficult for this to be monitored by employees alone.

02 Implemented System

- Cameras were installed at the entrances and exits to the store. The faces of people coming in and out were recorded.
- The faces of habitual shoplifters were stored in the system from images of past shoplifting incidents.
- If a habitual shoplifter enters the store, the in-store music changes to a specific melody that warns all employees to be on alert.
- High-resolution Full HD cameras were installed on top of the cash registers for recording the exchange of money. If any problems arose, the types of bills used can be verified.
- Cameras were installed that overlook the shelves in each product aisle.

03 Implementation Results

- When a habitual shoplifter enters the store, all employees can immediately be made aware of and on alert for monitoring the potential scene of a crime.
- The facial images of shoplifters were also used to search for past images, allowing the collection of irrefutable evidence against repeat offenders.
- The face of the shoplifter was obtained from images of the shoplifting incident, and a search is conducted to monitor the actions of the shoplifter within the store. The data also provided confirmation of thefts made at other stores.
- When disagreements arise over the amount of change returned, the types of bills can be immediately verified using high-resolution video to allow any such problems to be resolved on the scene.
- Camera images were also shown on a large in-store display to ensure product and customer safety. This also led to fewer instances of shoplifting and other crimes, reducing the total amount of losses incurred.
- Both the near and far ends of products displayed on the shelves are shown in sharp detail for an even higher level of product safety than before.

04 Future Expansion

- Because camera video enables the accurate capture of customer movement within the store, employees would like to use the security system to analyze the flow of customers on the store floor, along with customer gender, age, and other details to allow more efficient product arrangements and layouts.
- Management plans to implement identical systems throughout all stores in the supermarket chain and share information about habitual shoplifters to further reduce the amount of loss.

Monitoring of Urban Areas City Surveillance

01 Reasons for Implementing System

- Purse-snatching and other crimes have increased on city streets, and there have been growing calls from residents for the installation of security cameras.
- Increased number of incidents of cars, motorcycles, and other vehicles entering vehicle-prohibited zones, driving in the opposite direction on one-way streets, and other problems.
- Damage, defacing, and stealing of road signs, street lights, and other public property has required tremendous expenditures of funds for restoration.
- Illegal entry into restricted areas.
- Stalls were being opened on streets without permission, hindering the passage of people, and resulting in numerous complaints.
- Groups of young people were taking over open spaces for skateboarding and other activities, exposing young children playing in the area to danger.
- Safe management of children walking to school along the road was required.

02 Implemented System

- PTZ cameras, 360-degree cameras, dome cameras, and box cameras were combined to build a surveillance environment without any blind spots.
- Rain-wash coated models were used for PTZ cameras that were directly exposed to rain and snow. This prevented any hindrance to monitoring during bad weather.
- Coaxial LAN converters were used for camera locations that were 100 meters or farther from a LAN port. Coaxial cables were connected to cameras at distances of up to 500 meters, and power was also supplied.
- Camera intelligent functions were used to automatically detect intrusion into restricted areas.
- If areas existed that were prohibited to be within the field of view of the security camera, privacy masks were applied to limit monitoring and recording to the specific areas allowed.

03 Implementation Results

- Enabled monitoring over a wide area and at high resolutions, and simplified the process of determining the causes of any problems.
- Installation of cameras on city streets had an effect on reducing crime, and the number of criminal incidents fell sharply.
- Camera intelligent functions are used to automatically issue an alarm whenever someone enters a restricted area, or tries to drive on a one-way street in the wrong direction. This enables the situation to be quickly assessed and proper corrective measures to be immediately taken.
- Allowed camera installations in locations where it was not possible before due to power supply or cable length problems.
- Use of weatherproof cameras enabled installation in all required locations without the worry of changing weather or seasons.
- This system enabled city residents to recognize the positive effects of security cameras that also take privacy into consideration.
